DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,4-7,9,15, 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yarger (U.S. Patent No. 5,360,414).

Yarger discloses catheter having a tip end portion and a projection portion wherein the tip end portion comprises a plurality of side holes (28a-d) and having a groove 32,26 corresponding to the row for draining. Yarger discloses the width of the grooves to be between 0.1 mm to 1.0 mm to prevent significant occlusion of the grooves by debris or living tissue during drainage of a body cavity, viscous or wound. Yarger specifically discloses the through hole rows/ groove 26, 32 to be more narrow that the through holes (28) in order to provide fluid flow and prevent occlusion of grooves. See figures 1-10. See bridging paragraph starting on col. 2-3. col. 2, lines 30-36, col. 4 lines 64-col. 8, lines 57. Thus, as reasoned above, Yarger discloses the invention as substantially claimed. However, Yarger is silent to the specific depth of the grooves being 0.8 mm to 1.0 mm or the bottom surface of the single-pipe tube is 0.45 mm to 0.5 mm. Yarger does disclose that modifications and variations of the invention is well within the scope of the one of ordinary skill in the art. Thus, it would have been obvious

to one of ordinary skill in the art to modify the depth of the groove as claimed as a mere design choice lacking any criticality of size as being merely preferable for the intended flow passage for draining the area where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art.

Claims 3,10,13,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yarger (U.S. Patent No. 5,360,414) in view of Hideki et al. (JP 08-266616).

Yarger discloses the invention as substantially claimed. See above. However Yarger does not disclose a cuff for securement to the body. Hideki et al. disclose a catheter having a tip end portion and a projection portion wherein the tip end portion comprises a plurality of side holes and having a groove corresponding to the row for draining in the analogous art. Hideki et al. further disclose cuffs as elements 6-7 for retention of the device. See page 3 col. 4 of the translation and figures 1-2. It would have been obvious to one of ordinary skill in the art to modify the drainage catheter of Yarger with a cuff as taught by Hikedi et al. in order to provide securement and immobilization of the catheter as necessary for an ambulatory patient.

Response to Arguments

Applicant's arguments filed 09/19/05 have been fully considered but they are not persuasive. The Examiner has provided a new rejection in response to applicant's amendment.

Application/Control Number: 10/018,637

Art Unit: 3763

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LoAn H. Thanh whose telephone number is (571) 272-4966. The examiner can normally be reached on Mon. - Fri. (First Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Lucchesi can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
